YoungMe is a lifestyle skincare brand to help you improve your daily routines. Less is more is our philosophy that means having less helps us focus on important things.

Skin damage caused by sudden outdoor activities and sun exposure

Accelerated heat sensation even with slight sun exposure

Breakdown of collagen and elastin

Skin damage caused by sudden outdoor activities and sun exposure

UV/IR Aging

Unlike Australia's beautiful natural environment, the severe depletion of the ozone layer exposes Australians to intense sunlight and infrared radiation. As a result, many people experience skin damage such as skin cancer, pigmentation, and deep wrinkles as they reach middle age.

YoungMe's CEO also lived in Australia for 11 years and personally experienced photoaging, heat aging, and various skin troubles caused by UV rays and infrared light on the face, eyes, and skin. This led to a deep realization of the importance of protecting the skin.

To address these issues, we focused on developing products that can restore the skin and preserve youth without irritation. As a result, the two YoungMe Beauty mask packs were created, backed by K-beauty expert-level technology. Starting with the Australian market, they are now expanding their presence globally.

YoungMe

Premium UV/IR Aging Ampoule Pack Series

I don't know why, but lately I've been getting atopic dermatitis on my cheeks, making them extremely dry and red. ㅠㅠ

After using the Soothing Glam mask, the redness was greatly reduced and my skin felt really hydrated. ㅎㅎ

Even afterward, my skin didn't feel very dry, so the effects of the mask aren't temporary — they last until the next day!

The next day, my makeup applied so well, and it made me feel amazing. 😊

I'll order another set before I finish this one!

I love how moisturizing it is. I have trouble-prone skin and I'm usually sensitive to mask packs, but this one feels like my skin absorbed all the moisture. It also has a great soothing effect.**

It's not sticky at all, and there's plenty of essence, so it feels very comfortable on my face!!

The sheet is thick too—when I used other brands, my skin would sometimes get itchy, but with this one, there's absolutely no itchiness!

Wishing your brand great success!

Whenever my skin starts looking dull, I always use this mask.

Surprisingly, the next morning my face looks so bright and radiant.

It seems the brightening effect is really strong~ ^^

I don't even go to the dermatologist, but people keep asking me what procedure I had done... ㅎㅎ

My winter skin is dry and I worry about elasticity, so someone recommended the YoungMe mask pack to me ^^

The sheet isn't the typical non-woven fabric—it's more like a gel sheet, so it stays moist for longer, which I really like.

After using it, my skin definitely felt calmer and more hydrated. Even the next morning, my skin stayed soft and glowing, which was very satisfying. I have acne-prone skin, and after using it for 8 days, it *really* helped improve my breakouts!

My skin usually gets irritated easily when I travel, but thanks to the YoungMe mask pack, my skin actually got much better while I was in Taiwan. Since it's mainly focused on cooling and soothing heat-irritated skin, I think it would be super useful to bring when traveling to places like Taiwan, Thailand, or Australia!**
